R1

R1 integrates all Omni-Channel and supply chain workflows into a single, cloud based platform with unparalleled control. R1 drives complex data gathering, and deep learning analytics resulting in the highest sell-through and net margins for every touch, movement, sort and pricing decision.

Team
50+ specialists

Position
Senior .NET developer

Responsibilities
• Implementing new features
• Developing a microservice platform for distribution according to the SaaS model
• Support of the existing automation system
• Developing a warehouse management automation system

Technologies and tools
• C#, .NET Core, ASP.NET Web Api, PostgreSQL, Microservices

NDA

Our specialists have joined the team that works in the financial sector and is a partner of one of the major financial conglomerates BNP Paribas. We have developed a supporting system of major market transactions (using Artificial intelligence, Big Data, Dashboarding).

Team
32 specialists

Position
Senior .NET developer

Responsibilities
- Creating new business logic
- Implementing new features
- Creating new views on WPF
- Developing database structure
- Stabilization
- Refactoring

Technologies and tools
- C#, .NET, Entity Framework, WCF, RabbitMQ, Dapper, FastCrud, AutoMapper, WPF (MVVM), LINQ, T-SQL, StimulSoft Reports

Tracking system

We have developed a parcel tracking system: you enter a tracking number and the system displays where your parcel is. Once your parcel arrives at your local post office, you will receive an email notification. This system is installed on terminals that can be found in almost any post office. The system interface was designed so that even an elderly person could use it.

Team
40+ specialists

Position
.NET developer

Responsibilities
- Developing new forms
- Developing reports with DevExpress XtraReports
- Developing database structure
- Implementing lottery tickets plugin
- Stabilization

Technologies and tools
- C#, .NET, Entity Framework, WinForms, LINQ, T-SQL, DevExpress
